

First	Second	Mean
1	10	
1	10	5.5

Choose two numbers ...

... and find their mean.

10	5.5	
10	5.5	7.75

Replace the first number with the second and the second with the mean.

Work out the mean of the new first and second numbers.

Repeat the sequence of instructions inside the brackets. What happens if you keep going?

Investigate what happens to other pairs of starting numbers.
